

## Minutes from Meeting January 13, 2022

Guests Bob Worden and Karen Steele joined Committee Members Carl Orio, Sam Butler, Michael Trassati and Holly Patterson for tonight's meeting.

Discussion took place about issues with PFAS in town and the funding to study the issues. The current 3 year study is coming to an end. Atkinson Academy levels are being watched as they are very close to the limit that would trigger federal assistance with mitigation.

Our mission statement was discussed again. We are a committee that is advising the BOS and educating the town population on all things water related. Our mission may narrow or broaden in the future. The committee is ready and able to be nimble and respond to residents' needs.

General education and discussion about water issues historically to give committee members a broader understanding of the historical experiences. Karen Steele and Bob Worden were very knowledgeable and helpful.

Discussion about how our committee can educate area homeowners and others like realtors that are instrumental in expanding the knowledge base here in town.

Meeting for next month was set to 2/10/2022
